INTRODUCTION

The Eswatini General Certificate of Secondary Education (EGCSE) syllabuses are designed as two-year courses for examination in Form 5. The History syllabus has been designed to create an awareness in learners of their origins and identity and to help them develop an understanding of their nation and the wider world in order to create an understanding of their role in the society in which they live. The syllabus, therefore, seeks to bring an understanding of the historical processes such as change and causation. The syllabus assumes that learners have been through a Junior Certificate History programme.

The EGCSE syllabuses follow a general pattern. The main sections are:

Aims
Assessment Objectives
Assessment
Curriculum Content

History is an Elective Subject and falls into the Social Sciences and Humanities Field of Study which includes: Geography, Development Studies, French and Literature in English. The route for progression in studying History as a field of study includes but is not limited to pursuing a career in; Humanities, Journalism, Law, Philosophy, Political Science, etc.

AIMS

The aims of the syllabus are the same for all learners. These aims are set out below and describe the educational purposes of a course in History for the EGCSE Examination. They are not listed in order of priority.

The aims are to enable learners to:

1. acquire knowledge and understanding of the human past at a local, regional and global level;
2. develop an interest in and an enthusiasm for History, and to acquire a sound basis for future historical study and the pursuit of personal interest;
3. understand the nature and use of historical evidence, and use historical sources critically in their historical context;
4. investigate historical events, changes, people and issues;
5. develop linguistic and communication skills and organise and communicate knowledge and understanding of history;
6. draw conclusions and appreciate that these and other historical conclusions are liable to reassessment in the light of new or reinterpreted evidence;
7. develop thinking skills and problem solving abilities;
8. develop ethical values and understand their importance in nation building and international understanding.

It should be noted that not all these aims can be translated readily into assessment objectives.

The syllabus aims to provide a quality learning experience; stimulate the thinking skills of the learners; and to prepare students for the world of work, further education and lifelong learning. Secondary education must also contribute to the all-round development of the individual. This syllabus aims to encourage the development of national and cultural identity and values and attitudes which nurture respect for others.

This syllabus has been designed to encourage a range of different styles of teaching and learning and to encourage a positive attitude on the part of the teacher towards the learners' achievements. It has been designed for the complete range of ability. Assessment is by differentiation by outcome and allows attainment at different levels to be rewarded.

CURRICULUM CONTENT

The Curriculum Content is divided between Paper 1 and Paper 2. The content is explained through a number of Key Questions and Focus Points. GLOSSARY OF TERMS

It is hoped that the glossary will prove helpful as a guide, i.e., it is neither exhaustive nor definitive. The glossary has been deliberately kept brief not only with respect to the number of terms included but also to the descriptions of their meanings. Candidates should appreciate that the meaning of a term must depend in part on its context.

In all questions, the number of marks allocated is shown on the examination paper, and should be used as a guide by candidates to how much detail to give or time to spend in answering. In describing a process, the mark allocation should guide the candidate about how many steps to include. In explaining why something happens, it guides the candidate on how many reasons to give, or how much detail to give for each reason.
